## **Care and Maintenance**

All composite doors and infill panels manufactured and supplied by GBW Panels have been designed to give years of service with the minimum of maintenance.

The door leaf and PVC frame surround should be cleaned only with warm soapy water.

Do not use solvent based cleaners, abrasive cleaners or abrasive cloths as they may harm the surface finishes.

Bird droppings should be removed as soon as possible to avoid the possibility of damage to the coloured surfaces.

Door furniture is manufactured from either anodized aluminium or lacquered brass and does not require excessive cleaning in order to preserve the appearance. Please only use warm soapy water to clean them.

Hinges should be lubricated periodically with a light oil to ensure continued smooth operation.

Should the glass units require replacement:

On a door - The glazing cassette is designed to be removed from the inside to allow a new unit to be fitted.

On an infill panel – It is normal practice to replace the whole panel.

We hope that you enjoy many years of trouble free service from our products.
